Dear Sir:

In response to a verbal request from your organization, we are submitting herewith our proposal for a cost-plus-fixed-fee contract for various quantities of a transistorized receiver covering the frequency range from 3 to 30 megacycles.

Due to the similarity of the items to be furnished with that being developed under contract RD-71, no technical proposal is being submitted.

Item 1 of this proposal covers quantities of 3, 10 and 20 receivers of the type being fabricated under Amendment 1 to Contract RD-71. This receiver consists essentially of the RR-11AA receiver supplied under the basic contract modified to utilize a tuner covering the 12 to 30 megacycle range plus the RR-11BB tuner to cover the extended frequency range.

Item 2 covers funds required to repackage both tuners into one receiver with essentially the same components and performance as units to be delivered under RD-71. An appropriate band switch to select the desired frequency range will be included.

Item 3 provides for the delivery of 3 or 10 units of the repackaged type developed under Item 2. It should be noted that the prices quoted for Item 3 are predicated on the condition that Item 2 must also be awarded.

We are appreciative of this opportunity to bid, and we assure you of our utmost cooperation in the event of an award.

Very truly yours,

[REDACTED]  
Government & Industrial Division
